

NOTES:

1. Utilities shall be located as shown unless otherwise approved by the City Engineer.
2. The SANITARY SEWER ZONE shown above is the preferred corridor in which sewers are to be located, unless otherwise approved by the City Engineer.
3. Storm sewer and gas are to be located on the south or west side of the street.
4. Water, communications, and power are to be located on the north or east side of the street.
5. Install sanitary and storm sewer to *Clean Water Services Design & Construction Standards*.
6. The separation between water lines and sewer lines, subject to approval by the City Engineer, may be less than 10 feet, as per *Oregon Dept. of Human Services Rules, Chapter 6, Public Water Systems*.
