

If I Were Mayor...

If I was Mayor I would...I would make changes to the educational system to allow a jump in the economy. As well I plan to allow more economic and ecological growth in all places everywhere. I will also help as many people in poverty stricken areas and everyone else that needed help.

I would ONLY allow teachers with high Degrees, high scholastic record. In teaching more personal power in the school. . Another idea is to add uniforms to the school requirements. Many teachers sometimes base grades and academic potentials on there economic situation, there are many pro's and con's to this: Having uniforms help prevent gangs, Encourage discipline, identify intruders, improve attendance, and add a sense of personal belonging. The cons are the feeling of lack of freedom and the lost sense of self. But of these complaints can be quieted if uniforms are only active on certain days while still giving their benefits. The children are our future so it is a MUST that learning be the number one priority.

In my heart, and dreams, is to put our city the best educational system in the world.

In the economy I would allow small buissness corporations a better chance as well as those in poverty and middle classes. Large scale buissness would have to pay a higher tax rates than those in lower classes would pay a smaller portion. The higher payment would go to public schools and to help those in need. Some of the money will go to fund public food banks to help everyone in need. We need to be the better encouragement to help those less fourtunate. I will also make jobs pay a similar amount only based on time and quality of work not rank. I hope to make everyone happy no matter what their economic status is.

For the natrural world I will give special benefits to nature preserves, and parks and other nature parks. With that I will make a require schools to have school gardens and natural studies. Also I would require certain school to have composting bins to lower trash amounts and keep our landfills a little smaller and greener. Many places will also have newer recycling bins and trees to incourage recycling and sustainability. Also buildings of a certain size must have at least 4 solar panels to help lower it's electricity bills and other things .Helping the enviroment should be one of the top concerns along with many others in the world.

I learned these things from my vist to my cousins house and I learned from them ways to make a better world. As well as things that made it harder. Many things made life easy and simple and others made it harder. I hope that my personal experience will also help this town in many ways as possible and make life more comfortable and safe.

This is what I would do if I were mayor. To make this city the best it can be in all its granduer. And may be looked up to as a role model to others.
