Natural Hazard Mitigation Plan

Map Directory

Geographic Information Systems (GIS) Maps (Revised 03/2011):

City of Beaverton GIS Services developed all of the maps included in this plan. The contributions from this department were essential in illustrating the extent and potential losses associated with the natural hazards affecting the City.

All maps were revised based on the most current data available and a new map (Map #8) was generated comparing the FEMA 2003 100 Year Flood Plain and the 2006 Revised 100 Year Flood Plain that is pending adoption by FEMA and is based on more current data.

All map information is derived from the City of Beaverton’s GIS Services using existing city, county, regional and state geographical databases. Care was taken in the creation of these maps, but are provided “as is” using the “best available” data. The City cannot accept any responsibility for any errors, omissions, or positional accuracy, and therefore, there are no warranties that accompany these products (the maps). Although information from Land Surveys may have been used in the creation of these products, in no way does this product represent or constitute a Land Survey. Users are cautioned to field verify information on this product before making any decisions.

Map #	Map Title	Main Information Featured	Relevant Plan Chapters
1	Natural Hazards	100-Year Floodplain, Debris Flows, Steep Slopes	Chapter 7: Flood Chapter 9: Landslides
