**20.20. MULTIPLE USE LAND USE DISTRICTS**

**20.20.05. Multiple Use Areas.** The areas of the City that are designated as Multiple Use implement the policies of the City's Comprehensive Plan and are identified on the City's Zoning Map. Full urban services are to be provided.

Multiple Use zoning districts establish varied levels of residential and commercial uses, supporting transit and pedestrian oriented development with minimum density and intensity requirements. Multiple Use areas include: the Downtown Beaverton and Washington Square Regional Centers, Town Centers, and Station Communities.

**20.20.10. Purpose.**

- 1. RC-TO Downtown Regional Center—Transit Oriented District**  
The RC-TO District is intended to promote a transit-supportive multiple use land use pattern and to create over time a pedestrian-oriented commercial center within approximately a quarter-mile of light rail and commuter rail transit stations while supporting existing and future businesses in moving toward and achieving the vision of the Regional Center.
- 2. RC-OT Downtown Regional Center—Old Town District**  
The RC-OT District encompasses the City of Beaverton's original downtown, and is intended to maintain the mix of uses, scale of development, and appearance that are characteristic of this historically significant area while supporting existing and future businesses in moving toward and achieving the vision of the Regional Center.
- 3. RC-E Downtown Regional Center—East District**  
The RC-E District adjacent to Highway 217 and located generally more than a quarter-mile from the nearest light rail station, is intended to support existing and future businesses and accommodate automobile oriented uses and lower intensity uses which are inappropriate in either the RC-TO or RC-OT Districts while still maintaining pedestrian linkages to the transit stations and transit-served land uses.

20.20.10.

4. **OI-WS Washington Square Regional Center—Office Industrial District**

The OI-WS District is intended to provide areas for combining light manufacturing, research and development, business support service, office and supportive retail, distribution, and other accessory uses, and in an “employment activity center” concept. Additionally the District is intended to encourage compact, mixed employment uses that are transit supportive and pedestrian oriented in areas within approximately one-half mile of a commuter rail transit station.

5. **C-WS Washington Square Regional Center—Commercial District**

The C-WS District is intended to provide an area for businesses that require automobile accessibility while encouraging mixed use development that is transit supportive and pedestrian oriented in areas within approximately one-half mile of a commuter rail transit station.

6. **TC-MU Town Center—Multiple Use District**

The TC-MU District primarily permits office, retail, and service uses. Also Permitted are multiple use developments and residential development with a minimum density requirement. Industrial uses are limited to light manufacturing uses.

7. **TC-HDR Town Center—High Density Residential District**

Areas designated TC-HDR are high-density residential neighborhoods with a minimum of 24 dwelling units per net acre. Other uses include commercial uses and neighborhood parks. Small free-standing office and limited retail uses are allowed within multiple use developments.

8. **SC-MU Station Community—Multiple Use District**

The SC-MU District is generally located within one-half mile of light rail station platforms. Primary Permitted uses include office, retail, and service uses. Multiple use and residential developments are also Permitted with no maximum residential density. Manufacturing and industrial uses are limited. Minimum densities and intensities are required.

20.20.10.

**9. SC-HDR Station Community—High Density Residential District**

The SC-HDR District is generally located within one-half mile of light rail station platforms. Primary Permitted uses are for high density residential neighborhoods with minimum density requirements depending on proximity to a station platform and no maximum residential density. Other uses include commercial uses and parks that do not rely upon vehicular traffic access. Office and retail uses are only allowed within multiple use developments along with other restrictions.

**10. SC-S Station Community—Sunset District**

The SC-S District is generally located within one-half mile of the Sunset Transit Center Station and is intended to implement the land use goals of the Peterkort Station Area Plan. A variety of residential and commercial densities and intensities are required.

**11. SC-E1 Station Community—Employment Sub Areas 1 District**

**12. SC-E3 Station Community—Employment Sub Area 3 District**

The SC-E1 and SC-E3 Districts are intended to direct and encourage development that is transit supportive and pedestrian oriented in areas within approximately one-half mile of light rail transit stations. The purposes of the regulations that follow are to stimulate development that:

- A. generates sufficient intensity (number of employees or transit users) to be supportive of transit services available in the area;
- B. contains a complementary mix of land uses; and
- C. provides for limited industrial activities that could be incompatible if located in other Station Community zoning districts.

Areas zoned SC-E are characterized by a mix of light industrial, institutional, and office uses with an overall expectation for development to achieve a district-wide intensity of 40 employees per acre.

The sub areas are located so that the most intense development will occur adjacent to a light rail station or along a Major Pedestrian Route and is generally located within one-half mile of a light rail station. Sub-Area 3 generally applies to land that is not adjacent to a LRT station and is currently developed with uses that are generally industrial, institutional, or are currently low intensity campus industrial park in character which could have redevelopment potential.

**20.20.40. OTHER SC-S ZONING REQUIREMENTS**

1. [ORD 4578; March 2012] As to any and all property within the SC-S zoning district, approval of a Conditional Use Permit – PUD (Planned Unit Development), pursuant to Section 40.15.15.4. of the Development Code, shall be required prior to, or concurrent with, any land division or other land use approval(s) for the same property or any portion of the same property.
2. [ORD 4578; March 2012] On or before the full development or redevelopment of all property lying within the SC-S zoning district, the following development levels shall be met:

## 20.20.40.2.

- A. A minimum of 1899 residential dwelling units, but no more than 5,115 residential dwelling units; and
  - B. No more than 10,960,500 square feet of non-residential development.
3. [ORD 4578; March 2012] An applicant for a land use approval, other than a Sign Application, for any and all property within the SC-S zoning district shall demonstrate, through the submittal of a land use analysis, that the minimum and maximum development levels identified in Section 20.20.40.2. have been or will continue to be met when all properties within the SC-S zoning district have been divided or developed or both.
  4. [ORD 4578; March 2012] An applicant for a land use approval, other than a Sign Application, for any and all property within the SC-S zoning district shall demonstrate that the application complies with the Traffic Impact Analysis required by Section 60.55.20., associated with the effective Conditional Use Permit – PUD (Planned Unit Development) as to all property within the SC-S zoning district. Prior to approval for development of the minimum 1,899 dwelling units required by Section 20.20.40.2. of this Code, the TIA shall account for all vehicle trips associated with the minimum 1,899 dwelling units as existing conditions, whether or not the units have been approved or developed. Subsequent to approval of the minimum amount of dwellings in the district, the TIA shall account for actual existing conditions. In either case, vehicle trips associated with proposed non-residential development within the SC-S zone are additional to the existing conditions. The TIA shall identify appropriate measures to mitigate on-site and off-site deficiencies for all phases of the proposed development and demonstrate how the recommended mitigation is roughly proportional to the identified impacts created by the additional vehicle trips to be generated by the proposed development. [ORD 4599; February 2013]
  5. No more than 80 percent of non-residential development approved through a Conditional Use Permit – PUD (Planned Unit Development) application may be constructed prior to construction of the minimum dwelling requirement for the properties located within the SC-S zoning district. Once the minimum dwelling unit requirement for the properties located within the SC-S zoning district is constructed and has received Certificate of Occupancy, construction of the remaining 20 percent non-residential development may resume.

**20.25. DENSITY CALCULATIONS****20.25.05. Minimum Residential Density.**

- A. New residential development in all Residential, Commercial, and Multiple Use districts which permit residential development must achieve at least the minimum density for the zoning district in which they are located. Projects proposed at less than the minimum density must demonstrate on a site plan or other means, how, in all aspects, future intensification of the site to the minimum density or greater can be achieved without an adjustment or variance. If meeting the minimum density will require the submission and approval of an adjustment or variance application(s) above and beyond application(s) for adding new primary dwellings or land division of property, meeting minimum density shall not be required.

For the purposes of this section, new residential development shall mean intensification of the site by adding new primary dwelling(s) or land division of the property. New residential development is not intended to refer to additions to existing structures, rehabilitation, renovation, remodeling, or other building modifications or reconstruction of existing structures.

Minimum residential density is calculated as follows:

1. Refer to the definition of Acreage, Net. Multiply the net acreage by 0.80.
2. Divide the resulting number in step 1 by the minimum land area required per dwelling for the applicable zoning district to determine the minimum number of dwellings that must be built on the site.
3. If the resulting number in step 2 is not a whole number, the number is rounded to the nearest whole number as follows: If the decimal is equal to or greater than 0.5, then the number is rounded up to the nearest whole number. If the decimal is less than 0.5, then the number is rounded down to the nearest whole number.

## 20.25.05.

- B. **Residential Density Averaging.** Within a single land use zone, residential densities may be averaged across a property in order to allow for a variety of housing types, provided that the property is within a single, contiguous ownership, except that within a PUD may be averaged across multiple land use zones provided that the applicant demonstrates that the proposed development is compatible with existing and planned development on neighboring parcels. For the purposes of this standard, properties within a single, contiguous ownership also include those properties separated only by a street. [ORD 4584; June 2012]
- C. **South Cooper Mountain Community Plan.** Within the South Cooper Mountain Community Plan *Table 2: Land Use Designations and Capacity Estimates* outlines the density capacity expectations for development of land within the South Cooper Mountain Community Plan Area. The Land Use Implementation Policies of the Community Plan include policies that outline application of zoning and deviations from the capacity estimates of Table 2. [ORD 4652; February 2015]

20.25.10. **Floor Area Ratio**

- A. **Floor Area.** Floor Area is dependent upon whether residential development is involved or not. Residential only development is governed by minimum and maximum densities. Mixed Use Development (as defined in Chapter 90) and non-residential development are governed by minimum and maximum Floor Area Ratios. Floor Area Ratio (FAR) is the amount of gross floor area in relation to the amount of net site area, expressed in square feet. For Mixed Use Developments, no maximum limitation shall be placed on the number of dwelling units permitted. Multiple use developments with single use residential buildings are governed by residential density and FAR provisions, as calculated by 20.25.10.C, below. [ORD 4584; June 2012]
- B. **Permitted Density.** Except as otherwise approved through the Final Planned Unit Development process, phased development may be proposed so long as each phase complies with the minimum density.

20.25.10.

- C. **Method of Calculating Floor Area Intensity.** Required minimum FARs shall be calculated on a net acre basis, as defined by Acreage, Net. [ORD 4584; June 2012]

For Multiple Use Developments with single use residential buildings, residential densities and non-residential FARs shall be implemented as follows: [ORD 4584; June 2012]

Net buildable acres multiplied by the percentage of proposed residential use,  
 = land available to residential development,  
 multiplied by minimum residential density,  
 = minimum number of dwelling units required.

Net buildable acres multiplied by the percentage of proposed non-residential use,  
 = land available to non-residential development,  
 multiplied by the minimum FAR,  
 = minimum number of non-residential square footage required.

Example of Density and Floor Area Ratio  
 Estimates for a Multiple Use Development

District	TC-MU
Net Buildable Acres	5 acres
Residential Acreage	1 acre (20%)
Minimum Dwelling Units	24 Units
Retail Acreage	4 acres
Minimum Retail Square Footage (4 acres * 43,560 sq. ft./acre * 0.5 FAR)	87,120 sq. ft.

[ORD 4584; June 2012]

- D. **Multiple Buildings.** For developments or phases that involve multiple buildings, the FAR may be averaged by totaling the square footage of the buildings divided by the square footage of the net acreage of land within such development or phase.

## 20.25.10.

- E. **Planned Unit Development and Design Review Build-Out Concept Plan.** Projects may use the Planned Unit Development (PUD) or the Design Review Build-Out Concept Plan (DRBCP) process to develop a site in phases to achieve the minimum FAR established in this section. Such projects must demonstrate in the submittal plans how future development of the site, to the minimum development standards established in this ordinance or greater, can be achieved at ultimate build out of the PUD or DRBCP. The DRBCP may be used if the only Site Development Requirement being phased, altered, or otherwise varied is the minimum FAR. If any other Site Development Requirement is being phased, altered, or otherwise varied, the PUD process is to be used.

[ORD 4584; June 2012]

**20.25.15. Density Allowances.**

- A. **Accommodating Residential and Floor Area Density.** Residential and Floor Area density may be accommodated on a site where undevelopable areas cannot practicably allow development. The density allowance may be transferred from undevelopable areas to developable areas. Where higher intensity is proposed greater than the Code allowance, a PUD approval is necessary.
- B. **Maximum Density.** Maximum Residential and Floor Area density is calculated based upon site gross acreage.

**20.25.20. Supplemental Multiple Use Density Standards.**

**A. Regional Center.**

1. To accommodate smaller lot sizes within the RC-TO zone that existed prior to December 9, 1999, the required minimum floor area ratio for multiple use or non-residential developments may be further modified based upon lot dimensions, as follows:

Minimum Site Width	Minimum Site Depth			
	0-120'	121'-139'	140'-175'	176'+
0-100'	0.1	0.2	0.25	0.25
101'-200'	0.1	0.3	0.45	0.45
201'+	0.1	0.45	0.45	0.60

[ORD 4312; July 2004]

When provisions are made off-site for required parking, the permissible FAR shall be governed by 20.20.15.C regardless of site dimensions.

2. Maximum Floor Area Ratio for multiple use developments involving residential use in the RC-E Zone.

The maximum permitted FAR in the RC-E Zone for a multiple use project involving residential use shall be determined by the mix of uses and ratio thereof in accordance with the following:

% Non-Residential Floor Area	% Residential Floor Area							
	<20	20	30	40	50	60	70	80
20								1.7
30							1.6	
40						1.55		
50					1.5			
60				1.4				
70			1.3					
80		1.2						
90	1.1							
100	1.0							

[ORD 4259; September 2003]

# Represents factor to be multiplied times the maximum permitted FAR for a non-residential, or non-multiple use development to determine permitted FAR.

20.25.20.A.

3. The minimum residential density in residential only projects shall be restricted based upon lot dimensions, as follows:

Minimum Site Width	Minimum Site Depth		
	0-100'	101'-139'	140'+
0-150'	0 DU/Acre	12 DU/Acre	**
151'-200'	10 DU/Acre	24 DU/Acre	**
201'+	10 DU/Acre	**	**

\*\* Governed by standards set forth in 20.20.15.B.

When provisions are made off-site for required parking, the permissible FAR shall be governed by 20.20.15.B regardless of site dimensions.

[ORD 4584; June 2012]

**B. Town Center.**

1. When a Planned Unit Development or Design Review Build-Out Concept Plan is approved, phased development may be proposed, so long as an approved Phasing Plan is submitted as part of a PUD / DRBCP which demonstrates how required densities will be accomplished upon completion of the final phase. This could be accomplished by identifying future building sites, identifying plans for future intensification of existing buildings through the addition of more square footage, or by identifying future redevelopment of parking areas to more intensive land uses. In all cases, the phasing plan should demonstrate that proposed development will not preclude the ability to establish an urban street grid and urban levels of development as the Town Center matures.
2. Existing development, which either exists or is the subject of a vested development application as of September 17, 1999, shall not be deemed nonconforming solely on the basis of failure to meet the minimum FAR or residential density requirements. With redevelopment of the site, an approved phasing plan demonstrating how the development will meet the applicable FAR and residential density requirements upon final buildout must be submitted prior to issuance of necessary land use permits.
